Workday, Associate Software Developer x 2
Workday, Software Engineer

- Good mix of modules taught, good use of business modules to give experience to what working in that environment can be like, in conjunction with IT.
- The variety of content within the course and the online facilitation of some classes with recordings.
- Enjoyable campus to be on. Lecturers very helpful.
- Career Service was a very professional team that provided great support for me when I was looking for work for my internship and some good help after college also when looking for a full time position. Feel that they contributed to current success.

Feedback from Students: What stands out to you after your time at NCI:

- The internship was a key aspect to me securing a job in the industry I wanted.
- Great Staff in NCI, very supportive. Great systems in place to assist students with CV Writing & Interview Preparations.
- Open ended projects, allowing us to choose what to do. Promotes self learning etc
- Secondary support, extra classes were very helpful. Assignment due dates were appropriately spaced out.

First Destination results of full time honours undergraduate and master degree students - Class of 2023.
