# FICE \* National College of Ireland

## 100% FUNDING FOR ALL APPLICANTS WHO ARE UNEMPLOYED 90% FUNDING FOR ALL APPLICANTS WHO ARE IN EMPLOYMENT\*

\*National College of Ireland is now offering a limited number of funded places under the Springboard+ initiative, and the Human Capital Initiative (HCI) Pillar 1. All of these courses are available to eligible participants. There are eligibility conditions and requirements that must be met to obtain funding, please visit https://springboardcourses. ie/eligibility for more information.

## COURSES FOR JANUARY 2023 ONLINE BLENDED DELIVERY\*

- Certificate in Science in Computing
- Higher Diploma in Science in Computing (Software Development) (1 Year)
- Higher Diploma in Science in Computing (Software Development) (2 Years)
- Higher Diploma in Science in Computing (Artificial Intelligence/Machine Learning) (1 Year)
- Higher Diploma in Science in Computing (Blockchain) (1 Year)
- Higher Diploma in Science in Computing (Web Development) (1 Year)
- Higher Diploma in Science in Data Analytics (1 Year)
- Higher Diploma in Science in Data Analytics (2 Years)
- Postgraduate Diploma in Science in Data Analytics (1 Year)
- Postgraduate Diploma in Science in CyberSecurity (1 Year)

\*Note: This is a blended/online learning course. The majority of the programme will be delivered online. At certain limited and pre-scheduled times there will be opportunities for on-campus sessions.

These on-campus sessions will also be dual delivered so students will have the option of attending them online. Online classes will be live online.

> All applications must go through www.springboardcourses.ie For more information check out www.ncirl.ie or call 1800 221 721

Springboard+ is co-funded by the Government of Ireland and the European Union.

## **Certificate in Science in Computing** (Blended/Online Directed E-Learning Delivery) (1 Semester)

This is a blended/online learning course learning course that features Directed E-Learning activities such as live online classroom sessions and tutorials/videos on the College's e-learning system. This allows for online class time to be interactive, practical, and focused, with theory-based content being covered outside of class time with self-paced tutorials/videos, and practical content being covered in live online classes with support from lecturers and lab assistants. At certain limited and pre-scheduled times there will be opportunities for on-campus sessions. These on-campus sessions will also be dual delivered so students who do not wish to attend campus for these sessions will have the option of attending them online.

Location: Online (with limited classroom sessions)	Duration: 1 semester. Jan - May 2023.
<b>Start Date: Week</b> The course is expected to start in the week commencing 23rd of January 2023.	Applications: Apply online at www.springboardcourses.ie
commencing 25rd of junuary 2025.	Fees: A student contribution fee of €198 is applicable if you are
Indicative Schedule: Tuesday and Thursday 18.00 - 22.00.	in employment. No fees applicable if you are unemployed. The scheme does not cover any allowance for books and materials.
There will also be three hours self-paced learning per week on NCI's Learning Platform weekly. This will not appear on your timetable.	If a student contribution fee is applicable this must be paid in full no later than 10th March 2023.
Career Bridge classes will be delivered from 17.00 to 18.00 as	

## **Course Description**

per your timetable

This online blended course is ideal for non-technical individuals coming from different industry backgrounds who want to gain a good understanding of all the latest technologies and how to apply them to their businesses and sectors. It is flexibly delivered with guided videos and tutorials for you to watch and take time over during the week and then a live online class where you can discuss and learn from your lecturer and classmates. This programme gives you flexibility in how you study, an accredited qualification and a thorough understanding of key technology areas in one semester of online delivery.

The course gives learners the fundamental computing knowledge needed to enter into the computing industry, or to progress on to further higher education courses. This course is designed with flexibility in mind, allowing learners to work through bespoke video content and guided tutorials during the week, with live online practical classes at the end of the week. Self-paced content is broken into small manageable chunks, and live sessions are designed for live questions and answers based around industry issues and practical problems. The core modules focus on Programming and Databases, specifically Java Programming and SQL. The course also offers two specialisations to choose from. Each specialisation element is a focused module designed to bring the learners guickly to the industry entry standard for the chosen specialisation. The specialisations (subject to availability) are:

- Computer Architecture Operating Systems and Networks
- Statistics

The Computer Architecture Operating Systems and Networks specialisation provides learners with the knowledge and skills to work with core computer systems. Learners will gain practical knowledge and skills in core areas of computing such as:

## · VMware

- · PowerShell
- CommandLine
   Windows OS
- Linux OS / Ubuntu
- Cloud Services (AWS / Azure)
- . PC Hardware
- PC Hardware

The Statistics module will give learners the core skills needed to clean and analyse data using a variety of popular industry ready skills and tools such as:

- · Data Analytics
- · Descriptive Statistics
- · T-Tests
- · Probability
- · SPSS/Excel

As graduates are from other disciplines and with work experience, learners will have life skills and experiences that they bring with them on to the programme and into a new subject domain. Therefore, they are eligible for a number of roles. They could work in positions that are in- line with their skills but in the ICT sector or apply ICT knowledge gained through this programme to their current role.

## **Academic Entry Requirements**

Learners who have a level 5 or higher awards in the areas of computing, computer science, IT etc., will be considered. For those without a computing background, a level 8 degree or its equivalent in any discipline is required. Applicants who do not meet the above criteria will also be considered on an individual basis. The college operates a Recognition of Prior Experiential Learning (RPEL) scheme meaning applicants who do not meet the normal academic requirements may be considered based on extensive relevant work and other experience. This may be assessed using a portfolio of learning, demonstration of work produced, and interview.

## Laptop Requirements

Students are expected to successfully participate in lectures, laboratories and projects using a laptop computer with a substantial hardware configuration. A suitable configuration is 6GB of RAM (8GB or more are recommended); a 64bit x86 processor (Intel i5 or superior); 250+ GB of hard disk; wifi card; and a recent installed release of Windows operating system. It is the responsibility of the student to ensure their laptop is functioning correctly and that they have full administrator rights to the machine. NCI IT cannot provide support to personal devices.

The course requires internet access you will be required to ensure you have sufficient broadband speed and reliable connectivity from your place of study.

Free Laptop loan for eligible students on this course: Students who are eligible for HEA funding for this course may also be eligible for a free laptop provided on a loan basis for the duration of the programme. This will be a suitable specification machine for completion of the programme but must be returned once you have finished your course. Overall numbers of laptops available are subject to maximum numbers and no other alternatives can be offered.

Check https://www.ncirl.ie/Students/ Student-Services/Support-Services/ Student-Laptop-Fund for updates on the next opening date for applications.

## Award and Progression

The Certificate in Science in Computing is awarded by QQI at level 8 on the National Framework of Qualifications (NFQ). Students who successfully complete this course may be eligible to progress to a major award at Higher Diploma or Masters level on the NFQ.

## Assessment

Please note in some cases exams and assessments may take place in the daytime, evening or weekends.

## Modules

- Software Development
  Introduction to Databases
  Computer Architecture Operating Systems and Networks (Elective)
  Statistics (Elective)
  Career Bridge

## Higher Diploma in Science in Computing

## (Blended/Online Directed E-Learning delivery) (With specialisation in Software Development)

The Software Development stream provides learners detailed knowledge, problem-solving and technical skills in the area of software development using a modern programming language, such as Java, and application development framework(s). 2 Year or 1 Year options available.

## Blended/Online Directed E-Learning (2 Year) This is a blended/online learning course that features Directed E-Learning activities such as live online classroom sessions and

This is a blended/online learning course that features Directed E-Learning activities such as live online classroom sessions and tutorials/videos on the College's e-learning system. This allows for online class time to be interactive, practical, and focused, with theory-based content being covered outside of class time with self-paced tutorials/videos, and practical content being covered in live online classes with support from lecturers and lab assistants. At certain limited and pre-scheduled times there will be opportunities for on-campus sessions. These on-campus sessions will also be dual delivered so students who do not wish to attend campus for these sessions will have the option of attending them online.

Location: Online (with limited classroom sessions) Start Date: The course is expected to start in the week commencing 23rd of January 2023.	Duration: 2 years (4 semesters). Jan- May 2023, Sept - Dec 2023, Jan - May 2024 and Sep - Dec 2024 Applications: Apply online at www.springboardcourses.ie
Indicative Schedule: Tuesday and Thursday 18.00 - 22.00 There will also be up to three hours self-directed learning through the college e-learning system weekly. These will not show on your timetable.	Fees: A student contribution fee of €540 is applicable if you are in employment. No fees applicable if you are unemployed. The scheme does not cover any allowance for books and materials.
Career Bridge classes will be delivered one day per week in Semester 2 from 17.00 to 18.00. Day to be confirmed.	If a student contribution fee is applicable this must be paid in full no later than 10th March 2023.

## Blended/Online Delivery (1 Year)

Online classes will be live online with support from lecturers and lab assistants.

Location: Online (with limited classroom sessions)

**Start Date:** The course is expected to start in the week commencing 23rd of January 2023.

Indicative Schedule: Tuesday, Thursday and Friday 18:00- 22:00, and a number of Saturdays 09:00 - 18:00.

Career Bridge classes will be delivered one day per week in Semester 2 from 17.00 to 18.00. Day to be confirmed. Duration: 1 year (3 semesters). Jan- May 2023, May-Aug 2023 and Sep-Dec 2023

Applications: Apply online at www.springboardcourses.ie

Fees: A student contribution fee of €540 is applicable if you are in employment. No fees applicable if you are unemployed. The scheme does not cover any allowance for books and materials.

If a student contribution fee is applicable this must be paid in full no later than 10th March 2023.

## **Course Description**

This course will appeal to non-technical professionals or graduates with a level 8 degree from different backgrounds who would like to upgrade their skills in the computing domain, helping them to progress faster in their employment or to apply the gained knowledge in their current role.

The course teaches students the computing fundamentals, complemented with detailed knowledge, problem-solving and specialised technical skills required for designing and developing technical software solutions.

The course offers a specialisation in Software Development, which brings the participants quickly to the graduate standard in this area. This course is designed with flexibility in mind, allowing learners to work through bespoke video content and guided tutorials the week before class, then polishing their knowledge with live online practical classes. Self-paced content is broken into small manageable chunks, and live sessions are designed for live questions and answers based around industry issues and practical problems.

The Software Development stream provides learners detailed knowledge, problem-solving and technical skills in the area of software development using a modern programming language, such as Java, and application development framework(s). Depending on your delivery choice you will take Career Bridge as either classroom or blended online. It will help you to enhance your employability skills and improve your overall career prospects. Students will be assisted in identifying relevant employment or a placement during or within three months of completing their course.

Graduates may avail of many entry-level ICTrelated jobs, such as software developer, web development engineer and software engineer.

**Note:** The prospective students are required to specify the specialisation they would like to follow when they apply for a place within the Higher Diploma in Science in Computing programme. It is not possible to transfer course streams post registration.

## **Career Prospects**

This course is designed to meet the needs of the IT sector and secure future employment for graduates. Companies who hired 2021 students include: Bank of America (Java Developer), Cognizant (Junior Software Developer), Eurofins (Analytical Services Shopper), Travizory Border Security (Junior Java Developer), ID-Pal (Junior Software Developer), TikTok (Quality Analyst), Mason, Hayes & Curran (IT Helpdesk Analyst), Freelance Consultant (Senior Software Engineer), Sunway Travel (Web Developer).

## Who is the course for?

This course will typically appeal to graduates with a level 8 degree from different backgrounds who would wish to change their non-ICT qualification into the computer science field through a level 8 award in computing. Nonetheless, it is noted that the course is technical in nature and will entail a significant amount of independent study. Given the content and the timescale you will need to have a strong commitment to the course and a willingness to fully engage with the technical content.

## **Academic Entry Requirements**

A level 8 degree or its equivalent in a non-cognate discipline. Non-standard applications will be also considered on an individual basis.

The college operates a Recognition of Prior Experiential Learning (RPEL) scheme - meaning applicants who do not meet the normal academic entry requirements may be considered based on extensive relevant work and other experience. This may be

assessed through a portfolio of learning, demonstration of work produced, interview and assessment.

## Laptop Requirements

Students are expected to successfully participate in lectures, laboratories and projects using a laptop computer with a substantial hardware configuration. A suitable configuration is 6GB of RAM (8GB or more are recommended); a 64bit x86 processor (Intel i5 or superior); 250+ GB of hard disk; wifi card; and a recent installed release of Windows operating system. It is the responsibility of the student to ensure their laptop is functioning correctly and that they have full administrator rights to the machine. NCI IT cannot provide support to personal devices.

This course requires internet access you will be required to ensure you have sufficient broadband speed and reliable connectivity from your place of study.

## Free Laptop loan for eligible students

**on this course:** Students who are eligible for HEA funding for this course may also be eligible for a free laptop

Software Development specialisation (Blended/Online Delivery) (1 Year)

Career Bridge classes will be delivered one day per week in Semester 2 from 17.00 to 18.00. Day to be confirmed.	

## **Course Description**

This course will appeal to graduates with a qualification in another area but would like to bridge the gap into a career in ICT and to focus on the development of websites and web applications. The first semester will give you a solid grounding in the computing fundamentals allowing you to move in the second semester onto more specialist modules in the area of web development. The course provides the opportunity to work in a wide variety of IT roles or to apply web development skills to your current industry sector.

The course teaches students the computing fundamentals, complemented with detailed knowledge, problem-solving and specialised technical skills required for designing, developing and deploying software.

The course offers a specialisation in Web Development, which brings the participants quickly to the graduate standard in this area.

The Web Development stream provides learners with technical and development skills in core topics of web programming covering topics such as advanced client side development, cloud application development and DevOpsSec.

Note: The prospective students are required to specify the specialisation they would like to follow when they apply for a place within the Higher Diploma in Science in Computing programme. It is not possible to transfer course streams post registration.

## **Career Prospects**

Graduates from NCI's Higher Diploma in Computing programmes have progressed to successful roles in a wide variety of technical and nontechnical roles. This web development specialisation opens up particular opportunities in a broad range of web development roles.

## Who is the course for?

This course will appeal to graduates with a level 8 degree from different backgrounds who would wish to change their non-ICT qualification into the computer science field through a level 8 award in computing. Nonetheless, it is noted that the course is technical in nature and will entail a significant amount of independent study. Given the content and the timescale you will need to have a strong commitment to the course and a willingness to fully engage with the technical content.

## **Academic Entry Requirements**

A level 8 degree or its equivalent in a non-cognate discipline. Non-standard applications will be also considered on an individual basis.

The college operates a Recognition of Prior Experiential Learning (RPEL) scheme - meaning applicants who do not meet the normal academic entry requirements may be considered based on extensive relevant work and other experience. This may be assessed through a portfolio of learning, demonstration of work produced, an interview and assessment.

## Laptop Requirements

Students are expected to successfully participate in lectures,

laboratories and projects using a laptop computer with a substantial hardware configuration. A suitable configuration is 6GB of RAM (8GB or more are recommended); a 64-bit x86 processor (Intel i5 or superior); 250+ GB of hard disk; wifi card; and a recent installed release of Windows operating system. It is the responsibility of the student to ensure their laptop is functioning correctly and that they have full administrator rights to the machine. NCI IT cannot provide support to personal devices.

The course requires internet access you will be required to ensure you have sufficient broadband speed and reliable connectivity from your place of study.

note that in some instances exams may take place in the daytime, evenings and at weekends.

## Award and Progression

For all streams regardless of specialisation your final award will be a Higher Diploma in Science in Computing as awarded by QQI at level 8 on the National Framework of Qualifications (NFQ). Students who successfully complete this course may be eligible to progress to a major award at level 9 on the NFQ.

**Course Content** (Blended/Online Delivery) (1 Year)

## Semester 1

- · Software Development
- · Object Oriented Software Engineering
- · Introduction to Databases
- · Web Design and Client Side Scripting

## Semester 2

- · Computer Architecture Operating Systems and Networks
- · Cloud Application Development
- · Advanced Client side Development
- DevOpsSec
- · Career Bridge

## Semester 3

· Project

Springboard Careers Advisors will proactively support you to find relevant employment during the course or following completion of the course.

## Higher Diploma in Science in Data Analytics

## (Blended/Online Directed E-Learning Delivery) Students can choose a 2 year or 1 year Delivery options.

This is a blended/online learning course that features Directed E-Learning activities such as live online classroom sessions and tutorials/videos on the College's e-learning system. This allows for online class time to be interactive, practical, and focused, with theory-based content being covered outside of class time with self-paced tutorials/videos, and practical content being covered in live online classes with support from lecturers and lab assistants. At certain limited and pre-scheduled times there will be opportunities for on-campus sessions. These on-campus sessions will also be dual delivered so students who do not wish to attend campus for these sessions will have the option of attending them online.

## Blended/Online Directed E-Learning Delivery (2 Years)

Location: Online (with limited classroom sessions)

Start Date: The course is expected to start in the week commencing 23rd of January 2023.

Indicative Schedule: Online Delivery will take place Monday & Wednesday 18.00 - 22.00.

There will also be two to three hours of self-directed e-learning content. These will not appear on your timetable.

Career Bridge classes will be delivered one day per week in Semester 2 from 17.00 to 18.00. Day to be confirmed.

Duration: 2 years (4 semesters). Jan - May 2023, Sept - Dec 2023, Jan - May 2024, Sep - Dec 2024.

Applications: Apply online at www.springboardcourses.ie

Fees: A student contribution fee of €540 is applicable if you are in employment. No fees applicable if you are unemployed. The scheme does not cover any allowance for books and materials.

If a student contribution fee is applicable this must be paid in full no later than 10th March 2023.

## Blended/Online Directed E-Learning Delivery (1 Year)

Location: Online (with limited classroom sessions)

Start Date: The course is expected to start in the week commencing 23rd of January 2023.

Indicative Schedule: Monday & Wednesday 18.00 - 22.00.

Career Bridge classes will be delivered one day per week in Semester 2 from 17.00 to 18.00. Day to be confirmed.

There will also be self-paced learning per week on NCI's Learning Platform Weekly. This will not appear on vour timetable.

Duration: 1 year (3 semesters). Jan - May 2023, May - Aug 2023 and Sep - Dec 2023.

Applications: Apply online at www.springboardcourses.ie

Fees: A student contribution fee of €540 is applicable if you are in employment. No fees applicable if you are unemployed. The scheme does not cover any allowance for books and materials.

If a student contribution fee is applicable this must be paid in full no later than 10th March 2023.

## **Course Description**

The analysis and interpretation of data to address the problems of business and society is an area experiencing massive growth. Diverse  $\cdot$  Develop statistical skills to carry areas such as insurance, retail, sports, finance, pharmaceutical and government are all looking for people with skills in analysing 'big data' to help them make more informed decisions.

The course will furnish students with skills to enter the world of data analytics through building a foundation of strong statistical knowledge, developing problemsolving skills for business analysis, and helping you understand and use business data to deliver better decision making. This higher diploma will give you technical skills in statistics, programming, database management and web mining in addition to business skills such as business analysis that will help you make an impact in a wide range of roles. Students undertaking this course will be exposed to a variety of programming languages/tools that may include R, Python, SPSS, Excel, Weka, RapidMiner and SQL.

As a graduate of this course you will be able to:

- out effective data analyses using descriptive and inferential statistics within a business context
- Solve real business problems using generally accepted practices in the field of business analysis supported by the choice and application of appropriate data analysis tools
- Develop technical skills to process multiple datasets using relevant modelling, programming, data storage, and computational techniques
- Communicate effectively the results of data analysis to both technical and non-technical audiences
- · Apply analytical thinking techniques, communication, and interaction skills to support decision making and address business requirements
- Apply data-mining and knowledge discovery techniques to process datasets from multiple diverse data sources

## **Career Prospects**

2021 Graduates used the course to upskill or gain employment in roles such as Collection & Payable Analyst, Data Analyst, Business Process & Data Analyst, Junior Data Specialist, Scalability Analyst, OSM Planner, Trading Analyst, Market Specialist, Business Analyst.

Companies who hired from 2021 graduates of the Higher Diploma in Data Analytics include: Mintel (Junior Data Specialist), Valentia Partners (Consulting Analyst), Kirby Group Engineering (Business Process & Data Analyst), Data Analyst (Allianz), Electric Ireland (Trading Analyst), Facebook (Market Specialist), Flutter Entertainment (Specialist Trader), CPL for Twitter (Scalability Analyst), AON Assessment Solutions (Assessment Support Officer), Edwards Vacuum (OSM Planner).

## Who is the course for?

The programme is particularly suitable for those with numeracy skills. You do not need to have previously studied programming. However, given the timeframe and the amount of technical and statistical content applicants should be prepared to fully commit to the programme. 11

## Award and Progression

The Higher Diploma in Science in Data Analytics is awarded by QQI at level 8 on the National Framework of Qualifications.

Students who successfully complete this course may progress to a major award at level 9 such as the Masters of Science in Data Analytics.

## **Academic Entry Requirements**

Applicants holding an honours degree (level 8 or equivalent) in any discipline will be considered. Candidates will be able to demonstrate technical or mathematical skills as part of previous learning. Typically holders of more numerate degrees in areas like maths, engineering, architecture, physics or economics are likely to gain higher ranking in selection for the programme. Candidates with other level 8 honours degrees will also be considered and will need to be able to demonstrate technical or mathematical skills in addition to their level 8 gualification. For candidates who do not have a level 8 gualification, the college operates a Recognition of Prior Experiential Learning (RPEL) scheme - meaning applicants who do not meet the normal academic entry requirements, may be considered based on relevant work or other experience.

Students apply for either a 1 year or 2 year delivery. It is not possible to transfer options post registration.

## Laptop Requirements

Students are expected to successfully participate in lectures, laboratories and projects using a laptop computer with a substantial hardware configuration. A suitable configuration is 6GB of RAM (8GB or more are recommended); a 64- bit x86 processor (Intel i5 or superior); 250+ GB of hard disk; wifi card; and a recent installed release of Windows operating system. It is the responsibility of the student to ensure their laptop is functioning correctly and that they have full administrator rights to the machine. NCI IT cannot provide support to personal devices.

This course requires internet access you will be required to ensure you have sufficient broadband speed and reliable connectivity from your place of study.

**Free Laptop loan for eligible students on this course:** Students who are eligible for HEA funding for this course may also be eligible for a free laptop provided on a loan basis for the duration of the programme.

This will be a suitable specification machine for completion of the programme but must be returned once you have finished your course. Overall numbers of laptops available are subject to maximum numbers and no other alternatives can be offered.

Check https://www.ncirl.ie/Students/ Student-Services/Support-Services/ Student-Laptop-Fund for updates on the next opening date for applications.

## Assessment

The course will be assessed with a blend of continuous assessment and exams. This varies between modules but typically assessment is 50% continuous assessment and 50% exam. Please note that in some instances exams may take place in the daytime, evenings and at weekends.

## Postgraduate Diploma in Science in Data Analytics

## (Blended/Online Directed E-Learning) (1 Year)

This is a blended/online learning course that features Directed E-Learning activities such as live online classroom sessions and tutorials/ videos on the College's e-learning system. This allows for online class time to be interactive, practical, and focused, with theory-based content being covered outside of class time with self-paced tutorials/videos, and practical content being covered in live online classes with support from lecturers and lab assistants. At certain limited and pre-scheduled times there will be opportunities for on-campus sessions. These on-campus sessions will also be dual delivered so students who do not wish to attend campus for these sessions will have the option of attending them online.

Location: Online (with limited classroom sessions)

Duration: 1 year (3 semesters). Jan - May 2023, May - Aug 2023, Sep - Dec 2023

**Start Date:** The course is expected to start in the week commencing 23rd of January 2023.

Indicative Schedule: Tuesdays, Thursdays from 18.00 to 22.00 and every second Saturday from 09.00 - 18.00.

There will also be four hours of self-directed e-learning content. These will not appear on your timetable.

Career Bridge classes will be delivered one day per week in Semester 2 from 17.00 to 18.00. Day to be confirmed. Applications: Apply online at www.springboardcourses.ie

**Fees:** A student contribution fee of  $\in 650$  is applicable if you are in employment. No fees applicable if you are unemployed. The scheme does not cover any allowance for books and materials.

If a student contribution fee is applicable this must be paid in full no later than 10th March 2023.

## **Course Description**

This course aims to produce technically competent, innovative graduates that will become leading practitioners in the field of data analytics. Upon completion, graduates will be able to:

- $\cdot$  Conduct independent research and analysis in the field of data analytics
- Demonstrate expert knowledge of data analysis and statistics, and the tools, techniques and technologies of data analytics utilised in both technical and business contexts
- Critically assess and evaluate business and technical strategies for data analytics
- Develop and implement effective business and technical solutions for data analytics
- Critically appreciate ethical and data governance issues relevant to data analytics

The course is designed to accommodate those with specific interests in data analytics, whether that may be of a more technically focused or a more business focused nature. All learners will also gain exposure to pertinent legal issues and ethical issues associated with the data analytics field.

Students will gain exposure to product commercialisation issues associated with data analytics. The course is delivered by faculty and practitioners using academic research, industrydefined practical problems, and case studies.

Students undertaking this course will be exposed to a variety of programming languages/tools that may include R, Python, SPSS, Excel, Weka and RapidMiner.

## **Career Prospects**

This course is designed to meet the ever-growing need for deep skills in Big Data/Analytics to fill a skills shortage in Ireland. Companies who have hired 2021 graduates from this course include: Certas Energy Retail Europe (Data Analyst), Cardinal Health (Senior Data Analyst), Bank of Ireland (NIR Data Analyst), Bank of Ireland (NIR Data Analyst), Accenture (Service Delivery Ops Analyst), Business Analyst (Bank of America), ComReg (Pricing Analyst), Gifts Direct (Senior Data Analyst), Optum (Principal Data Scientist/ Associate Director), Amazon (Senior Analyst), Accenture (Data Science Analyst), Real World Analytics (Senior Data Analyst/Product Lead).

## Who is the course for?

This course is for graduates who have substantial technical, especially programming, and mathematical/ statistical skills. Graduates from non-STEM disciplines (Science, Technology, Engineering, and Mathematics) that have not developed these skills will need to be able to demonstrate an aptitude for technical (programming) and mathematical problem solving.

## **Academic Entry Requirements**

Applicants are normally required to hold a minimum of a level 8 honours gualification (2.2 or higher) or equivalent on the NFQ in a cognate discipline. Candidates will be required to demonstrate technical or mathematical problem solving in previous learning. Graduates from programmes without embedded technical or mathematical problem solving will need to demonstrate these skills in addition to level 8 qualifications (via certifications, qualifications, certified experience and assessment tests). All applicants must evidence prior programming experience (e.g., via academic transcripts or recognised certification). Standard applicants are holders of technical, numerate degrees who are likely to gain a higher ranking in order of merit for admission to this programme. Normally, these would be applicants

who have gained a minimum of a Level 8 qualification in a numerate discipline, typically Computing or Informatics. Such applicants with a level 8 qualification (2.2 or higher) or equivalent are eligible for direct entry. Following computing graduates, we next assign priority to candidates with a background in engineering, mathematics, physics and chemistry. Consideration of these applications is by detailed examination of the content, assessments and syllabi of applicants' primary degrees. Such candidates may also be assessed by interview.

Additionally, applications will be considered for those with a minimum of a Level 8 qualification in a programme with a significant IT and/ or numerate component which could include Management Information Systems, Accounting, Economics, Marketing Management, Sociology and Biology. Programmes in this category may vary greatly in mathematical and information technology content and applications would be assessed by detailed examination of programme content, assessments and syllabi. Candidates with gualifications in this category will be assessed by interview.

## **Laptop Requirements**

Students are expected to successfully participate in lectures, laboratories and projects using a laptop computer with a substantial hardware configuration. A suitable configuration is of RAM (8GB or more are recommended); a 64- bit x86 processor (Intel i5 or superior); 250+ GB of hard disk; wifi card; and a recent installed release of Windows operating system. It is the responsibility of the student to ensure their laptop is functioning correctly and that they have full administrator rights to the machine. NCI IT cannot provide support to personal devices.

This course requires internet access. You will be required to ensure you have sufficient broadband speed and reliable connectivity from your place of study.

## Free Laptop loan for eligible students on this course:

Students who are eligible for HEA funding for this course may also be eligible for a free laptop provided on a loan basis for the duration of the programme. This will be a suitable specification machine for completion of the programme but must be returned once you have finished your course. Overall numbers of laptops available are subject to maximum numbers and no other alternatives can be offered.

Check https://www.ncirl.ie/Students/Student-Services/ Support-Services/Student-Laptop-Fund for updates on the next opening date for applications.

## Assessment

The course will be assessed with a blend of project work and exams. This varies between modules but typically assessment is 50% continuous assessment and 50% exam. Please note that in some instances exams may take place in the daytime, evenings and at weekends.

## **Award and Progression**

Graduates of the Postgraduate Diploma in Science in Data Analytics are awarded an NFQ Level 9 qualification. You can optionally complete the additional 30 credits required to upgrade their qualification to the MSc in Data Analytics (Not included under Springboard+ additional fee would apply).

## **Course Content**

(Blended/Online Delivery) (1 Year)

### Semester 1

- · Statistics for Data Analytics
- · Database and Analytics Programming

## Semester 2

- Data Mining and Machine Learning I
- · Modelling, Simulation, and Optimization
- Business Intelligence and Business
   Analytics Elective Modules Group 1
- Data Intensive Architectures Elective Modules Group 2
- · Career Bridge

### Semester 3

- · Data Mining and Machine Learning II
- Data Governance and Ethics
- · Domain Applications of Predictive
- Analytics Elective Modules Group 1 · Scalable Systems Programming - Elective
- Modules Group 2

Note: Electives are designed to allow students gain specialised knowledge in Data Analytics related areas. Electives may have dependencies, by picking a particular elective in Semester 2, students may restrict themselves to a single choice of elective in Semester 3. For the current suite of electives, dependencies are:

- Elective Modules Group 1: Business Intelligence and Business Analytics -> Domain Applications of Predictive Analytics
- Elective Modules Group 2: Data Intensive Architectures -> Scalable Systems Programming

Electives will run subject to student demand.

Springboard Careers Advisors will proactively support you to find relevant employment during the course or following completion of the course.

Note that all modules count towards the final award classification.

## Postgraduate Diploma in Science in Cybersecurity

## (Blended/Online Directed E-Learning) (1 Year)

This is a blended/online learning course that features Directed E-Learning activities such as live online classroom sessions and tutorials/videos on the College's e-learning system. This allows for online class time to be interactive, practical, and focused, with theory-based content being covered outside of class time with self-paced tutorials/videos, and practical content being covered in live online classes with support from lecturers and lab assistants. At certain limited and pre-scheduled times there will be opportunities for on-campus sessions. These on-campus sessions will also be dual delivered so students who do not wish to attend campus for these sessions will have the option of attending them online.

Location: Online (with limited classroom sessions)	Duration: 1 year (3 semesters). Jan - May 2023, May - Aug 2023, and Sep-Dec 2023.
Start Date: The course is expected to start in the week	
commencing 23rd of January 2023.	Applications: Apply online at www.springboardcourses.ie
Indicative Schedule: Tuesdays & Thursdays 18.00 to 22.00 and every second Saturday 9.00 - 18.00	Fees: A student contribution fee of €695 is applicable if you are in employment. No fees applicable if you are unemployed. The scheme does not cover any allowance for books and materials.
Career Bridge classes will be delivered one day per week in Semester 2 from 17.00 to 18.00. Day to be confirmed.	If a student contribution fee is applicable this must be paid in full no later than 10th March 2023.
There will also be self-paced learning per week on NCI's	

Learning Platform Weekly. This will not appear on your timetable.

## **Course Description**

Cybersecurity is an essential need for a modern society in which information technology and services pervade every aspect of our lives. Cybersecurity has the fastest growth rate among all areas of IT, with the labour market encountering a severe workforce shortage in this field.

The aim of this programme is to provide learners with essential expert technical knowledge, competence, and research skills of the most important technical concepts of cybersecurity and how they are applied in emerging areas such as device security and forensics.

The course is technical and practical in nature, uniquely embedded in industry, and develops in-depth expertise of core technical topics within the area of cybersecurity such as information security, secure programming, network security, penetration testing, malware analysis, IT law and ethics, and technologies and tools that support application and service vulnerability detection, incident detection,

data and log retrieval and analysis. Thecourse also provides a sharper focus into forensics and cloud security through the two specialisations that are offered to the learners.

## **Career Prospects**

Several reports highlight the skills shortage in cybersecurity. The State of the Cyber Security Sector in Ireland 2022 Report indicates that 83% of businesses expect to grow their cyber security team over the next 12 months, with half expecting to grow at a rate of 25% or higher. This field has the fastest growth rate when compared with the rest of technology jobs.

## Who is the course for?

This course is ideal for ICT professionals or graduates with an honours degree in computing/ computer science or in a cognate area (STEM) that wish to develop a career as a cybersecurity professional; to take a leading technical or managerial role; to progress faster in their employment or to apply the knowledge in their current role. Candidates who do not hold a computing degree and are currently working in the IT sector may be considered, based on relevant academic qualifications or extensive work experience.

As a graduate of this course, you will be able to:

- Conduct independent research and analysis in the cybersecurity domain including secure application design, development and testing within a given context, e.g., web, cloud computing, and forensic investigation.
- Demonstrate practical skills and expert knowledge of technologies and tools that support cryptanalysis, application and service vulnerability detection and patching, security incidents detection and log file analysis.
- Critically evaluate the design and implementation and evaluation of a research idea.
- Analyse and evaluate the legal, ethical, and economic ramifications of developing secure applications and services.
- Communicate effectively to a range of audiences in both written and verbal media and undertake selflearning in order to acquire new knowledge.

## Award and Progression

The Postgraduate Diploma in Cybersecurity is awarded by QQI at level 9 on the National Framework of Qualifications (NFQ).

Students who successfully complete this course can optionally complete the additional 30 credits required to upgrade their qualification to the MSc in Cybersecurity (Not included under Springboard+, additional fee would apply).

## **Academic Entry Requirements**

A minimum of a level 8 primary degree in Computing or a cognate area with a 2.2 award or higher or equivalent on the National **Oualifications Framework in** Computing or a Cognate area. Candidates are expected to have programming ability. Cognate area means a STEM (Science, Technology, Engineering, and Mathematics) degree that also taught programming/application development related modules. An assessment and/or interview may be conducted to ascertain suitability if necessary for candidates who do not meet the normal academic requirements.

The college operates a Recognition of Prior Experiential Learning (RPEL) scheme meaning applicants who do not meet the normal academic requirements may be considered based on relevant work and other experience. This may be assessed using a portfolio of learning, demonstration of work produced, and an interview. The programming ability of the applicant will also be assessed. Non-English speaking applicants must demonstrate fluency in the English language as demonstrated by IELTS academic score of at least 6.0 or equivalent.

## Laptop Requirements

This programme has a BYOD (Bring Your Own Device) policy. Specifically, students are expected to successfully participate in lectures, laboratories and projects using a portable computer (laptop/notebook) with a substantial hardware configuration. The minimal suitable configuration is 8GB of RAM (16GB are recommended); a modern 64-bit x86 multi-core processor (Intel i5 or superior); 250+ GB of available space in hard disk; WiFi card; and a recent version of Ubuntu, macOS, or Windows.

It is the responsibility of each student to ensure their computer is functioning correctly and that they have full administrator rights. NCI IT cannot provide support for these personal devices.

This course requires internet access you will be required to ensure you have sufficient broadband speed and reliable connectivity from your place of study.

**Free Laptop loan for eligible students on this course:** Students who are eligible for HEA funding for this course may also be eligible for a free laptop provided on a loan basis for the duration of the programme. This will be a suitable specification machine for completion of the programme but must be returned once you have finished your course. Overall numbers of laptops available are subject to maximum numbers and no other alternatives can be offered.

Check https://www.ncirl.ie/Students/ Student-Services/Support-Services/ Student-Laptop-Fund for updates on the next opening date for applications.

## Assessment

The programme is assessed by means of continuous, in-semester, assessment and final examination. http://courses.ncirl.ie. Please note that in some instances exams may take place in the daytime and at weekends.

## Course Content (Blended/Online Delivery) (1 Year)

The course offers two specialisations: Forensics and Cloud Security. Learners must select one specialisation. Specialisations will only run due to student demand.

## Semester 1

- · Security Fundamentals
- IT Law and Ethics
- Network Security and Penetration Testing

## Semester 2

- · Secure Programming for Web
- · Cryptography
- · Malware Analysis
- · Career Bridge

## Semester 3

- Research in Computing
  Secure Programming for Application Development
- Cloud Security Specialisation
- Cloud Security (Elective)
- Forensics Specialisation
   Incident Response and Analytics (Elective)
- Forensics and eDiscovery (Elective)

Electives will run subject to student demand.

Springboard Careers Advisors will proactively support you to find relevant employment during the course or following completion of the course.

\*Note that all modules count towards the final award classification.

## APPLICATION AND ELIGIBILITY

### Why Choose NCI

All programmes under Springboard+ and the Human Capital Initiative are accredited by QQI, so they are recognised nationally and internationally. The College provides a supportive environment and tailored facilities for students returning to education after a number of years. In particular for Springboard+/HCI a dedicated programme leader will look after the organisation of your course and make sure all your needs are met.

All our programmes are practical and are delivered by industry experts.

We benefit from a convenient location with the LUAS just outside the door and we are minutes from Connolly Station. Career Bridge, Work Placement, industry based projects and a dedicated team of career development professionals will work with you to help you gain the most from your qualification and get back into the workforce, or develop your career.

### Laptop and Internet Access Requirements

It is the responsibility of the student to ensure they have a computer device of sufficient specification to complete their course and adequate internet connectivity where appropriate

## **Restrictions Regarding Previous Participants**

- You can take a maximum of three Springboard+ courses in any five-year period. After that, you will need to wait 2 years before enrolling on another Springboard+ course.
- If you have failed to successfully complete two Springboard+ courses in the past, you are ineligible to apply again for a period of 2 vears
- If you have taken two courses in the past but were unsuccessful in the second, you are ineligible to apply again for a period of 2 years.

In order for the above to be assessed, you will need to have fully completed any Springboard+ course you enrolled on in the past - i.e. have completed all assignments, received a final grade, and had your status updated to "Complete" by the course provider. Until then you will not be able to apply for another Springboard+ course. You should ie/eligibility. also note that priority will be given to applicants who are long-term unemployed and to those who have not taken a Springboard+ course before.

Unemployed applicants must be Department of Employment Affairs and Social Protection (DEASP) customers and in receipt of an eligible DEASP payment, signing for social insurance contribution credits or be previously self-employed to be eligible for a funded place on a Springboard+ programme.

### Fees

The Springboard+/HCI scheme allows for 100% funding of the tuition cost of these programmes if you fall into one of the below categories:

- Unemployed and in receipt of an eligible DEASP payment or signing for credits
- Returners
- Previously Self-Employed
- Working Family Payment\*

\*If you are in-receipt of the Working Family Payment or on a Community Employment Scheme, your fees will be covered in full, regardless of the course NFQ Level, but you should discuss your intention to take a Springboard+ course with your Employment Personal Adviser before applying.

For those in employment or applying under the status of 'recent graduate' a student contribution fee is required. This is payable by the participant and must be paid in full by 10th March 2023. The fees quoted are the student contribution for the full course. These can be paid on the NCI website, see www.ncirl. ie/ . NewStudents for details. Applicants can also have their employer fill out a sponsorship form indicating the employer's commitment to pay the student contribution element. Completed sponsorship forms should be returned to fees@ ncirl.ie within two weeks of accepting your place Demand for these courses is expected on the course.

### **Funding Requirements**

Returners, recent graduates, formerly selfemployed and employed applicants will be required to meet nationality and residency requirements for Springboard+ courses. Please see 'Springboard+ Participant Eligibility' at www.springboardcourses.ie/fag for more information. 'Returners' are defined as people that have been out of the work environment for a number of years due to childcare or other caring obligations and have a previous history of employment but may require upskilling, reskilling or cross-skilling to transition back to the workforce. A recent graduate is defined as a graduate from a full-time NFQ Level 8 degree within the 12 months prior to the start of a Springboard+ course.

More information can be found at 'Am I Eligible for a Springboard+ Course' at www.springboardcourses.ie/eligibility

Students with an unemployed status have limitations on our Higher Diploma ICT programmes .Two year part-time courses: If you are unemployed and in receipt of a jobseekers payment (including Farm Assist and Qualified Adults of Working Age) / BTEA you are not eligible for the two year ICT Conversion Courses. Please see www.springboardcourses.

1 Year full-time mode of study programmes: NCI's 1 Year Higher Diploma programmes are delivered in the evening with a full time mode of study. If you are unemployed and in receipt of a DEASP payment (including Farm Assist and Qualified Adults of Working Age) you are not eligible if you have been in receipt of this payment for less than 9 of the previous 12 months from your course commencement. Our 1 year Higher Diploma programmes are classed as full time mode of study run in the evening and those who secure a place on a 1 year Higher Diploma course must transfer to 'Back to Education Allowance' (BTEA). The 10% course fee will be waived for applicants in receipt of BTEA. You must be in receipt of BTEA at the time of course commencement to be eligible for For Further Information Contact fundina.

Level 9 Postgraduate Courses: Please note that to participate in NFQ Level 9 (postgraduate) course, a period of at least one year must have elapsed since completing a full time undergraduate degree course leading to a major award at level 8 on the NFQ.

### Application

Please feel free to contact us on 1800 221 721 (Option 4) to enquire about an application. Alternatively you can email springboard@ncirl.ie. We are not permitted to accept applications directly from candidates as all Springboard+ and Human Capital Initiative applications must be made online through www.springboardcourses. ie. Please note that all applicants must meet NCI's academic admission criteria for any courses and as per previous years all courses and specialisations run subject to numbers. Eligibility for funding does not infer eligibility for this course.

### Places Available:

to exceed the number of available places and places are limited. Priority in the awarding of places must be given to those who are long-term unemployed as well those who have not previously undertaken a Springboard+ course. Decisions are communicated through www. springboardcourses.ie. If you do not meet the normal academic entry requirements please do not delay in applying as you may be required to submit additional documentation and/ or participate in an interview. A cut-off date for applications will also apply and this will be posted on the www.springboardcourses.ie website when you make an application to NCI. This date is subject to change based on programme demand and programmes may close at any time without warning when capacity is reached.

Note: Programmes are available for study within Ireland only. Please note that access to the Springboard website is restricted from jurisdictions outside of Ireland

### **Department of Social Protection Payments**

We advise that all payment gueries should be addressed to your local Intreo, Social Welfare Office to confirm continuation of a Social Protection payment.

More information can be found at 'Social Protection FAOs' www.springboardcourses.ie/faq

### **Course Funding in the Event** of Obtaining a Job

Should you obtain a job during your course of study the funding will remain in place for the duration of your course. The timing of the classes is aimed to allow people to work and study at the same time. If you do gain employment during the course please contact us to see how we can best facilitate you completing your course. If you do not qualify under Springboard+ you may apply directly to National College of Ireland for our fee paying courses at admissions@ncirl.ie

Tel: 1800 221 721 (Option 4) Web: www.ncirl.ie Email: springboard@ncirl.ie

## Career Bridge Part of the NCI Careers & Employability Service

NCI Career Development & Employability Office won the AHECS "Excellence in Employability Award" for 2013, 2014, 2016, 2018, 2020 (Highly Commended) and The Education Awards 2021 for Career Impact Strategy.

## **Career Bridge**

Part of the success of your Springboard course to meet your career goals is the Career Bridge module which is integrated into your programme. Practical career management classes take place in your 2nd Semester one day a week between 5 p.m. and 6 p.m. In addition, employer events relevant to your course and career are organised throughout the year of your studies. This module is designed to complement the technical skills of your course and provide you with the skills employers seek such as identifying your strengths and addressing skills gaps, developing your online and offline brand, networking effectively and managing your career path.

## What Career Bridge will offer you:

- · Individualised career counselling and development.
- · Individualised, strategic career planning addressing advancement and transition.
- · Professionalised, targeted CVs and high impact applications.
- · Expert interview coaching.
- · Career networking and personal branding strategies.
- · Practical skills workshops and one to one consultations.
- · Online effective career resources available 24/7.
- · Access to the NCI Weekly Vacancy newsletter and the LinkedIn Group Tech Network for Students and Graduates for jobs and events

The NCI Career Development and Employability office works in partnership with employers to support students in both identifying and achieving their future ambitions. Our career service has won the National AHECS award for Employability for 5 out of the last 9 years.

## The partnerships with employers are in the form of:

## Interview marathons

- · Sector-specific mock interviews with key employers
- · Targeted On-Campus Careers Fair
- · Alumni networking events
- $\cdot$  Technical and whiteboard simulations
- · Employer presentations
- · Skill- and competency-focused workshops

Career Bridge, similar to the other modules on the programme, will have learning outcomes relevant to your career aspirations.

## **Employment and Placement**

We work proactively and collaboratively with you and industry partners to obtain relevant employment during or within 3 months of completing your course. A graduate or entry level position, or indeed relevant employment acts as the work placement requirement. If a work placement is required, your Careers Advisor will actively support you in identifying a suitable work placement through your network.

Active engagement with your Careers Advisor and with the Career Bridge module markedly increases the likelihood of a successful career transition or progression. We look forward to working with you to realise your career goal.

## What Springboard students say...

I really like the fact that the college offers a service to help you find work after you're finished your course. The classes help you to build an employable version of yourself and the personal help you get improves your chances of getting a job.

Student of HDip in Science in Computing (Software Development)

Career Bridge is a great resource to have in the college. Even though you won't feel like using it until the second semester, it's a really good idea to engage with the service early on to take advantage of the services they offer. All in all, highly recommended... Barry, Postgrad in Data Analytics

The student must be proactive and take accountability for their own job search and if they do the staff in the careers section are genuinely fantastic. Student of HDip in Science in Data Analytics

Thanks to a great career advisor, ...... I was able to get on the internship within the IT company and at the end of the internship was offered a job in that company. Joanna, HDip in Science in Web Technologies

The course was really enjoyable and the emphasis on careers rather than just exam results sets NCI apart from any other institutions I've attended.

Student of HDip in Science in Computing (Software Development)

Students should develop themselves technically but also awareness of what prospective employers look for should help you adapt your approach to a job application accordingly. Student of HDip in Science in Computing (Cloud stream)

Participate in full. The course is very rewarding and there is great support. NCI listens and is willing to change if things are not working out. Career Bridge is excellent and you should attend the classes even if you have a solid job.

Toby, HDip in Science in Data Analytics

I believe that it was this kind of integration between course and career guidance that led to my success at NCI. I was a gardener by trade and now I'm a Software Test Automation Engineer in Java. I get well paid and now I have a well-paid career ahead of me

Robert, HDip in Science in Computing (Software Development)

## **ONLINE INFORMATION EVENINGS**

Speak to the lecturers at one of our Online Open Evenings

8th December (5pm – 7pm) 11th January (5pm – 7pm)

## ONLINE TASTER CLASSES & INFORMATION SESSION
